

# Clarity

## Framing the Learning

### Criteria for Success Action Template

Think of an upcoming lesson for which there will be a product or performance to demonstrate mastery.

1. What is the objective for the lesson?
2. What is the product or performance the students will do to demonstrate mastery of the objective?
3. List the criteria for success, being careful to focus on what the student product or performance will include.
4. Describe how you will share the criteria with students.
5. What will you do to see if students really understand each criterion?
6. Would it be appropriate to have students self-evaluate or give peer feedback? Why or why not?
